OBJECTIVE

An innovative student passionate about web development and crafting dynamic, user-friendly digital experiences. Enthusiastic about modern technologies, problem-solving, and creating impactful solutions . Constantly exploring new ideas to enhance web applications, with a strong foundation in coding, design, and development . Eager to contribute creativity and technical expertise to the field.

INTERNSHIPS

1. Palle Technologies [🌐] *06-2024* *09-2024*

Java Full Stack Developer *Bengaluru,* India

- Streamlined user experience with front-end development utilizing HTML, CSS, and JavaScript.
- Ensured application security by integrating authentication mechanisms like OAuth 2.0 or JWT tokens into server-side APIs.
- Effectively utilized version control tools like Git for collaborative development while avoiding code conflicts.
- Enhanced application performance by optimizing Java code and implementing efficient algorithms.

2. National Cadet Corps[NCC] *06-2023 - 02 2024*

B certificate with A Grade *Bengaluru*, India

- Developed leadership skills in junior cadets by assigning them challenging tasks and responsibilities.
- Promoted teamwork and collaboration among cadets by organizing team-building activities and exercises.
- Upheld the highest standards of professionalism and integrity, serving as a positive role model for cadets to emulate in their own careers.

EDUCATION

- **GURU NANAK FIRST GRADE COLLEGE** *10-2021 - 06-2024*

Bachelor of Computer Applications (BCA) CGPA: 8.4 Bidar , Karnataka

- **ARMY PUBLIC SCHOOL**

Intermediate Percent: 7.6% Shillong , Meghalaya

PROJECTS

❖ **Intelligent Alumni–Student Interconnect Platform**

- **Tech Stack:** MERN, MongoDB , JWT Authentication
- Engineered a scalable networking platform that seamlessly connects students and alumni for mentorship, internships, and job discovery.
- Integrated **real-time chat, live event notifications, and smart profile-matching , Gamification** using WebSockets and REST APIs.
- Optimized database performance on MongoDB Atlas with secure JWT-based authentication.

❖ **TinDog – Dog-Matching Web Application (Tinder for Dogs)**

- **Tech Stack:** HTML, CSS, Bootstrap
- Built a visually appealing and responsive pet-matching website inspired by Tinder's UI.
- Designed premium-style components and interactive front-end layouts using Bootstrap's grid and utility classes.
- Delivered a clean, user-friendly interface optimized for fast loading and cross-device compatibility.
- Packaged the project for deployment so users can easily view, customize, or purchase components.

SKILLS

- Effective Communication Skills
- Strategic Leadership
- Analytical Problem Solving
- Proficient in API Design
- Database Management
- Code Debugging

ACCOMPLISHMENTS

- NPTEL Certificate of Cloud Computing (Elite)
- NPTEL Certificate of Soft Skills and Personality (Elite)
- Introduction to Career Skills in Software Development
- One Week National Workshop in ML, Big Data, Deep Learning
- Youth Empowerment Program certificate
- IEEE International Leadership Summit certificate
